

# Enginuity Portable Grid

## CQ-2000

40 Foot Sound Attenuated Power Module  
74 DBA @ 7M

### Features: Rental Grade Power Module

- Cummins QSK-60 EPA Emission certified Tier II
- 2000 KW stand-by – 1825 KW prime power
- Cummins CPG model DQKAB 2000 KW Generator Set
- Full digital automatic paralleling with Cummins PCC 3201
- 2000 KW Power Module capable of operating in “Island Mode” or “Utility Export Mode”
- Newage Stamford PMG alternator
- Cummins PCC 3100 digital paralleling controls
- Full Utility Class relaying and protection switchgear (free standing)
- Remote fault diagnostics via dedicated broad band connection
- 3200 amp breaker electric operated with GFI
- Engine driven charging alternator
- Battery isolation switch
- Battery charger
- Battery box
- Batteries
- Block heater (isolation valves)
- 110% containment of all engine fluids

We bring the **grid** to you

### Special Features:

- 40 foot ISO container with 4” insulation
- Critical grade insulated silencer
- 74 DBA @ 7 M
- Vertical air discharge
- Air discharge roof screen
- Dual Core 45C (113 F) Rated vertical discharge electric drive radiator
- Curb side cable connection box (breaker safety trip)
- Shore power connection inside cable connection box
- External emergency stop (two external curbside mounted)
- Lamarch battery charger
- Sealed battery box mounted within containment
- Battery isolation switch
- Batteries dual 8-D
- 110 % containment of all engine fluids
- 1250 gallon Double Wall UL 142 fuel tank with auto matic fuel topping system
- Racor duplex fuel water separator mounted within containment
- Two point fueling access external
- Fire extinguishers (two)
- AC / DC lighting package on solid state timer (contained fixtures)
- 200 Amp shore power electrical distribution
- Four service access doors
- Curbside oil and coolant drains with isolation valves
- Digital fuel level readout (dual)
- Manual fuel sight gauge top tank mounted
- Cable storage compartment
- Document storage box
- Aluminum tread plate in walk ways
- Ladder Box (locking)
- Ladder and two stabilizer jacks saddle mounted (locking)
- New tri-axel 40 foot chassis with 10 hole Budd Wheels and radial tires with under-slung ladder box.
- Full performance tested in all modes prior to shipping with complete documentation and “as-built” drawings.

### Cutting Edge Technology:

A product designed to meet market demand for highly portable and versatile compact power generation. EPG power modules are environmentally friendly and easy to operate. A design that makes economic sense with the highest quality materials available.
